Subject: New Guidance on RAD fate, eco, health language for determination Documents

To All,

Until otherwise notified, [____] has directed that CCD Program Managers should use in Determination Documents only the fate, eco, and health language that RAD develops and sends to CCD. Furthermore, we have been directed to cut-and-paste RAD's fate, eco, and health language into Determination Documents without making any edits to the language. CCD Program Managers and CCD QC reviewers of draft Determination Documents are not to draft the fate, eco, or health language ourselves.

Ex. 6 Personal Privacy (PP), Ex. 6 Personal Privacy (PP) and I met with RAD folks (Ex. 6 Personal Privacy (PP)) yesterday to discuss this directive and related issues. We agreed that, for all of the FY2019, "hair on fire," and Pre-FY2019 cases that will be designated as "priority" cases each month, RAD will check previous RAD fate, eco, and health language and will update 6that language, if needed. RAD will notify CCD will notify CCD when the updated language, if needed, has been developed; the mechanism of this notification is still being finalized but should be done by early next week.

1. Because all determination documents must now use only RAD's fate, eco, and health language, if you're working on a determination document, you'll need to wait until you have confirmation from RAD that the language is ready before you finish drafting the determination document and submit it to the CCD QC review queue.

2. Determinations that are already in the CCD QC queue must also use only RAD's fate, eco, and health language. For any determinations of yours that are already in the queue, when you have confirmation from RAD that the language is ready, include the updated language in your determination document and then alert [**Ex. 6 Personal Privacy (PP)**] that it's ready for QC.

   - Exception: cases in the SNUR batch 19-2b (i.e., the next batch of SNUR-based Not Likely Determinations) – most of these determinations have already been QC'd in NCMB and have been reviewed by CCD IO. RAD will review these determinations documents directly to determine if they need any revisions for consistency with their current templates.

If you have a question/concern about fate, eco, or health language after RAD has confirmed that it's ready, contact RAD directly on the CBI side and CC me *(i.e.,* [Ex. 6 Personal Privacy (PP)](fate), [Ex. 6 Personal Privacy (PP)](eco), [Ex. 6 Personal Privacy (PP)](health), and[Ex. 6 Personal Privacy (PP)]health).

If RAD subsequently makes additional changes to fate, eco, or health reports – after they already have notified you that they are complete – then RAD will alert the program manager that additional changes were made.
